

MUNEEB RANA

MERN Stack & Mobile Developer

☎ +92 348-4616075 ✉ muneebjs.css@gmail.com

SUMMARY

Full-Stack Developer with 4+ years of experience specializing in the MERN stack (MongoDB, Express.js, React.js, Node.js) and Next.js. Proven track record building and shipping production web applications end-to-end — from founding and independently building an e-commerce brand to contributing across full-stack teams. Skilled in RESTful API design, payment integrations, and performance optimization, with strong collaboration habits in agile environments. Passionate about clean code, continuous learning, and staying current with the latest tools and frameworks.

SKILLS

- MongoDB, Express.js, React.js, Next.js & Node.js — building and deploying full-stack applications
- HTML, CSS, JavaScript, TypeScript & responsive design principles
- RESTful API design, server-side logic & database integration
- Git & GitHub — version control, pull requests, code review
- Deployment: Heroku, Netlify, Vercel, AWS EC2, Render
- NoSQL (MongoDB) & SQL databases
- Stripe & crypto payment integrations, payout management
- Socket.io, Firebase, WordPress, Postman, VS Code, npm/yarn

PROFESSIONAL EXPERIENCE

MERN Stack Developer

June 2024 – Present

Edugram Inc.

- Built and maintained responsive Next.js applications with React, Tailwind CSS, and JavaScript.
- Integrated REST APIs and optimized data fetching for faster performance.
- Collaborated with the backend team to improve Node.js/Express API design.
- Managed code with Git/GitHub and contributed to smooth CI/CD workflows.
- Participated in code reviews and sprint planning to ensure quality releases.

Frontend Developer

September 2023 – June 2024

Edugram Inc.

- Developed and maintained responsive web applications using Next.js, HTML, CSS, Tailwind CSS, and JavaScript.
- Collaborated with backend developers to integrate APIs, enhancing application functionality and performance.
- Utilized Git and GitHub for version control, ensuring seamless collaboration and efficient code management.

Full Stack Developer (Next.js & TypeScript)

March 2024 – June 2024

Mas Uno

- Developed and deployed a full-stack web application using Next.js and TypeScript, enhancing user experience and application performance.
- Worked closely with cross-functional teams to design and implement new features, ensuring smooth integration between front-end and back-end systems.
- Conducted code reviews and used Git and GitHub for version control, promoting best practices and code quality.
- Implemented Stripe payment integration and managed payout processes seamlessly.

Full Stack Developer (Next.js)

July 2021 – September 2023

GM

- Designed and developed full-stack web applications using Next.js, React, Node.js, and MongoDB, ensuring seamless user experiences.
- Collaborated with UI/UX designers and product managers to create intuitive interfaces and implement new features.
- Implemented best practices for code quality and performance optimization, using Git and GitHub for efficient version control.
- Integrated a crypto payment gateway to support coin deposits.

FOUNDER & FREELANCE PROJECTS

Founder & Full-Stack Developer (Solo Build)

April 2026 – Present

Noirwear — noiwearofficial.com

- Founded and independently built Noirwear, an online apparel brand, owning everything from concept and design to development and deployment.
- Built the full e-commerce storefront solo — product catalog, cart, and checkout — on a modern full-stack setup.
- Handle all technical decisions as a solo founder, including hosting, performance, and ongoing feature development.

Web Developer (WordPress)

May 2026 – Present

Forest Therapy Hub — foresttherapyhub.com

- Develop and maintain foresttherapyhub.com on WordPress, handling site updates, customization, and functionality improvements.
- Own front-end design changes, plugin integration, and ongoing performance and SEO upkeep.

Full Stack Developer

March 2026 – July 2026

Vale — vale.club

- Contributed as a full-stack developer on vale.club, building and maintaining features across the front-end and back-end.
- Collaborated with the team to ship new functionality and improve application performance.
